public void onClick(View view) { Snackbar.make(view, "Hello First Activity", Snackbar.LENGTH_LONG) .setAction("Action", null).show(); }); @Override public boolean onCreateOptionsMenu(Menu menu) { // Inflate the menu; this adds items to the action bar if it is present. getMenuInflater().inflate(R.menu.menu_first, menu); return true; } @Override public boolean onOptionsItemSelected(MenuItem item) { // Handle action bar item clicks here. The action bar will // automatically handle clicks on the Home/Up button, so long // as you specify a parent activity in AndroidManifest.xml. int id = item.getItemId(); //noinspection SimplifiableIfStatement if (id == R.id.action_menu_first) { return true; } return super.onOptionsItemSelected(item); @Override public void onBackPressed() { drawer = (DrawerLayout) findViewById(R.id.drawer_layout); if (drawer.isDrawerOpen(GravityCompat.START)) { drawer.closeDrawer(GravityCompat.START); } else { if (Build.VERSION.SDK_INT >= Build.VERSION_CODES.JELLY_BEAN) { finishAffinity(); } else { super.onBackPressed(); here, the parent of FirstActivity is BaseActivity. In this way you can use same NavigationView for all activities. **Note:** Don't forget to change your launcher activity into FirstActivity.
